ARKA GAZEBO®

A SMART GAZEBO BUILT FOR SMART SPACES

“**ARKA**” means Sunbeam or Ray of light in Sanskrit.

It is a hub built to meet the 21st century mobile generation by providing clean energy , connectivity & local information on go which runs on **Clean Green and Solar energy.**

ABOUT COMPANY

Yclept 4e labs imagines, designs, tests, and builds urban innovations to help cities meet their challenges dealing with energy, communities & economic growth for green sustainable future.

VISION & MISSION

Although efforts are being made to reach the demands of public spaces and people still remain unaltered and needs are not fulfilled.

So, we believe in renewable energy because it is the future energy where energy is derived from the clean natural resources & its clean energy is used. As these resources & energy will dominate the world in the future & also in the world market.

We believe that cities are powerful prime move factor in faster innovation. So time has arrived to transform cities into smart cities and make people lives efficient by adapting smart technology enabled solutions.

So, we are here to guide everyone throughout their lives to adapt simplified, modernised eco-friendly smart technology solutions to their lives.

Specially designed for advanced INDIA

*Customization on the basis of area

WHAT OUR GAZEBO CAN DO ?

● CHARGING DOCKS

Charges, Phones, Laptops, Tablets, Cameras & other wearable devices 24/7 through built in cables & wireless docks using clean energy from the sun.

● DIGITAL DISPLAY

Digital display in Gazebo gives space for public information messages, important notices & Advertisements for people through the led display.

- Maps.
- Weather report.
- News and many more..

● ENVIRONMENTAL SENSING

CO2, noise, temperature, humidity & air quality sensors in gazebo helps to give present conditions of environment around the smart gazebo & the analysis report can be seen on the display screen.

● INTERNET ACCESS

In the immediate vicinity of smart benches in gazebo users will be able to access the internet through the built in Wi-Fi hotspot.

● SOCIAL & RELAX POINT

People can enjoy their free time sitting on benches while recharging their mobile phones & check the local info on display.
